

TRAILrider® Slipform Paver

Edge Detail

1900' x 10' Pervious
Concrete Installation
Palo Alto, CA
2-1/2 days to complete

Edge touch-ups.

TRAILrider® needs only 8" side clearance. Paving near obstructions (a ravine in this case) is easy. Pervious mixes are extruded so well that finishing is typically not required.

Benefits:

- Forms, places, compacts, and finishes in ONE PASS.
 - Works with Standard or Pervious concrete.
 - Easy to operate (on-site training included.)
 - No forming.
 - Touch-up only edges, cut joints, and cure.
- Perfect for sidewalks, bike and walk paths, golf cart trails, single lane driveways and other speciality applications.
 - Reduced labor costs.
